

Week of 9/23-9/27

Monday: Intensive Processing

- In the morning we will be processing the trip with whole-group and small-group conversations. We will be outlining the experience and breaking it down in order to put it in a format that aids each student in the book writing process.
- In the afternoon we will revisit Angel Falls Trail with our mandalas.

Tuesday: Mauldin House Garden

- We will begin the day in the garden. We will continue working on the book. Students will be given time to work on independent work.
- For Biology we will begin looking at the Adopt-A-Stream program. This will give us an opportunity to contribute to the community, do real science, generate real numbers for math studies, data collection, and sharing. We will hopefully be “adopting” the wetland at the Greenway and a couple of sections of the Soque River. We will be working closely with Becca Risser from the SRWA, as well as continuing to work with Kevin Peyton from N.Ga. Tech, and Steven Patrick from the local 4-H office.
- In Spanish we will be looking at the culture and history surrounding their Independence Day (Sept. 16, 1810).
- We will be continuing the Edward Tulane Read-ALoud and adding new vocab.

Wednesday: Clarkesville Soup Kitchen

- Some of our students will return to the soup kitchen to serve. The rest of the day will be similar to Tuesday.
- Possibility of fish shocking after lunch with N. Ga. Tech.

Thursday: Mauldin House Garden

- Very similar to Tuesday.
- The Sound of Music @7pm

Friday: Adventure

- We are checking on the possibility of floating a section of the Soque River.
